POWER YOU CAN TRUST

Gentech delivers powerful generating solutions ranging from portable petrol and diesel powered units to hardworking, heavy duty gensets. **Gentech is 100% Australian owned** and our products are manufactured locally, so you can be sure they are made to withstand our harsh Australian conditions. With over 20 years experience, Gentech today leads the pack with its unsurpassed reliability, technological innovation and the support of over 550 dealers Australia wide.

Did you know that Gentech was the first to introduce clean power with less than 6% total harmonic distortion?

This means that Gentech generators are the ideal power source when using precision equipment requiring stable frequency and voltage, like products with built-in computer functions (for example laptops and projectors). With Gentech generators, you'll get maximum efficiency from electric motors and uninterrupted operation from sensitive appliances, including power inverters, battery chargers, power tools, televisions and other sensitive equipment.

Generator Selection Made Easy

1. List the wattage of all the appliances you need to run together. If an appliance is rated in Amps only, then multiply $\text{AMPS} \times \text{VOLTS} = \text{WATTS}$.
2. Add the total WATTS of all these appliances (see example in table).
3. Select the Gentech generator that will best deliver both the running and starting Watts with ease.

Or call us on **1800 248 699** so we can help you choose the best generator to suit your needs.

APPLIANCE	RUNNING WATTS	STARTING WATTS
Fridge	300	750
TV	120	120
Lights	75	75
Freezer	200	500
1hp pump	750	4500
TOTAL	1445	5945

Example shown above is an approximation only

Generator Selection Made Easy

Conversion Factors kW/kVA @ 8pf $\text{kVA} \times 0.8 = \text{kW}$ 2000 Watts = 2.5 kVA

Note: Electric motors need 3 x motor hp to start than to run. Don't forget to add this to your required kW.

RELIABLE POWER FOR ANY SITUATION

GENERATORS 2.8kVA TO 20kVA With generators ranging from 2.8kVA to 20kVA, the Gentech range has it covered. Offering models for domestic use to power TVs, bar fridges and small hand tools to larger units to power welders, wool presses, medium air conditioners and other heavy duty equipment. A popular choice with builders, farmers, and anything in between. Available in Petrol or Diesel with Recoil and/or Electric Start.

LISTER PETTER PORTABLE PETROL GENERATORS From a brand internationally known for high quality & reliable engines, comes a range of portable petrol generators that you can depend on. Lister Petter portable generators pack a lot of power in compact footprint, making it a portable & economical choice for your worksite. These units come with electric start, AVR, fuel & voltage meter, handle & wheels. Battery is included.

WELDER GENERATORS & WORKSTATIONS Featuring 7kVA of real grunt, and up to 200 Amps of welding, the Gentech welder generators will keep you working until the job's done. Add a 14 CFM Air Compressor and 12/24 DC Battery Charger and you have a complete workstation. Available in Recoil and Electric Start, these units are the ultimate for portable power supply.

TRACTOR DRIVEN ALTERNATORS Ranging from 50kVA to 100kVA, all the Gentech Tractor Packs are especially designed to run from the back of a tractor, making them perfect for rural power applications. Convenient and sturdy, Tractor Packs are used to back up dairies or rural properties during power outages.

MINE SPEC GENERATORS Mine spec generators are built tough to handle the harsh terrain of Australian Mine Sites. These single phase portable diesel generators are fitted with specifications to meet mine site requirements. Ranging from 6.8kVA to 8.5kVA, these units are a winner when it comes to mining safety.

RCD GENERATORS Gentech offers the complete package, packed full of features such as Work Safe RCD protected outlets, optional lifting bar and wheel kit with extendable handles. These totally portable units are perfect for any tradie working on-site.

* The power rating of the engine indicated in this flyer is the net power output tested on a production engine for the engine model and measured in accordance with SAE J1349 at 3600 rpm.

Mass production engines may vary from this value. Actual power output for the engine installed in the final machine will vary depending on numerous factors, including the operating speed of the engine in application, environmental conditions, maintenance and other variables.

+ Please note that these are approximate values and have been calculated. Changes in load and operating condition will vary these values. They should only be used as a guide.

° Suits Small dust covers (optional extra) ^ Suits Large dust covers (optional extra)

1-Phase: 230 Volts. 3-Phase: 415 Volts.
